Sellora: plans, 4-day trial, closed stores, product CSV and themes

All prices are in Pakistani Rupee (PKR). All times are Asia/Karachi (UTC+5).

1. Choosing a plan at signup

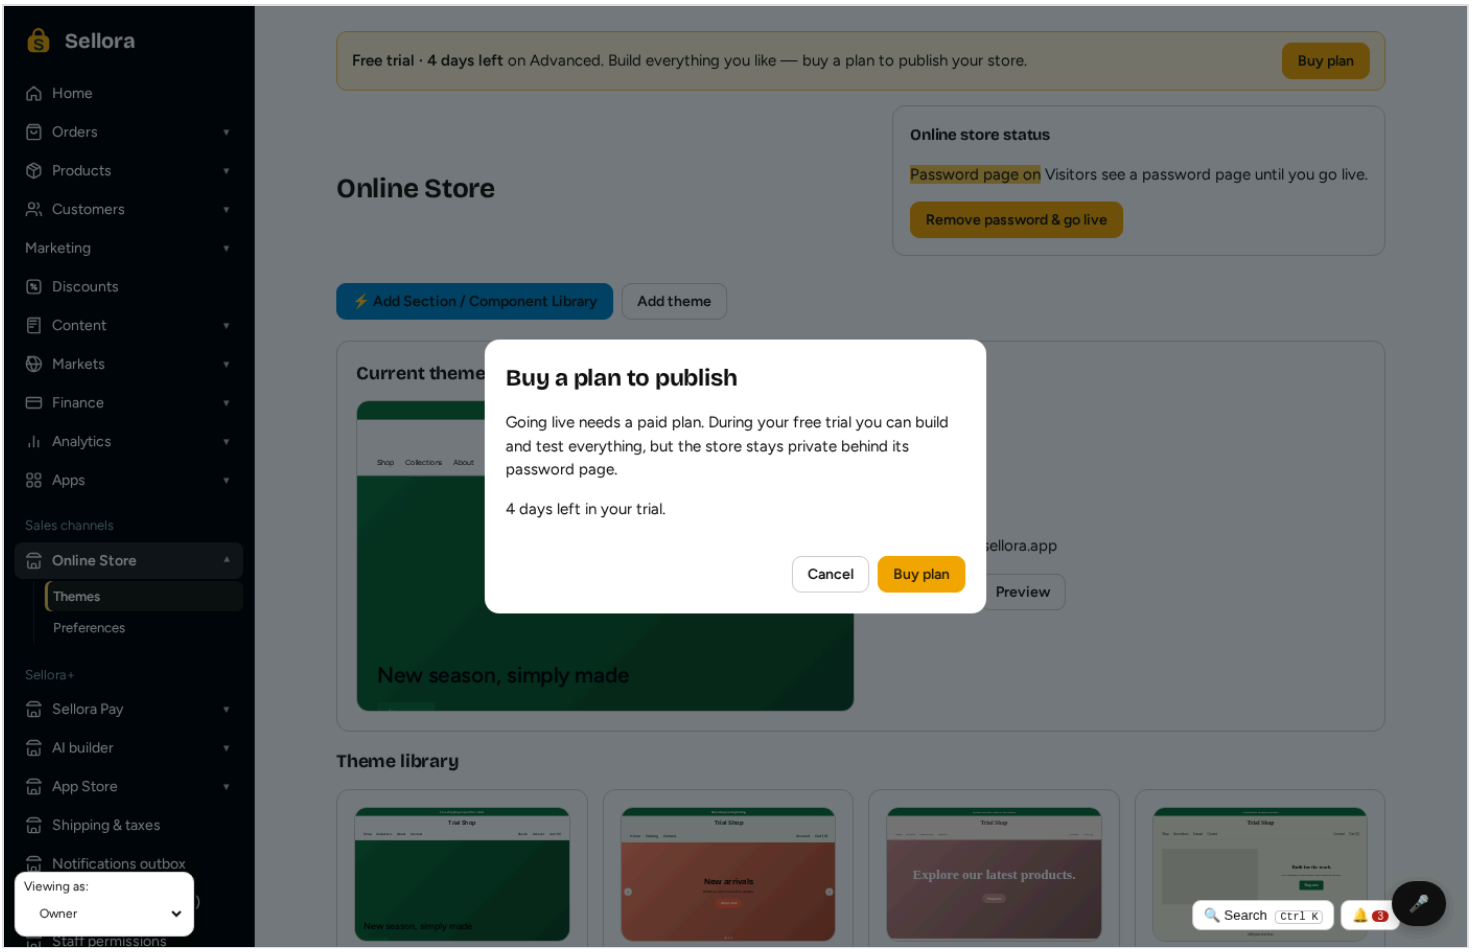

A new seller picks a plan before creating the store: **Basic** (Rs 300 a month), **Grow** (Rs 600) or **Advanced** (Rs 1,000). **Enterprise** starts from Rs 4,999 and is arranged through sales. A switch shows monthly or annual prices; annual is 20% cheaper. The Free plan is no longer offered to new stores. It is kept hidden only so old stores keep working.

2. The 4-day free trial

Every plan starts with a 4-day free trial. During the trial the seller can do everything: add products, import a CSV, edit themes, and set up payments and shipping. The store stays behind its password page, so shoppers cannot see it yet.

Publishing a theme, removing the password or going live opens a box that says **"Buy a plan to publish"**. A banner at the top shows how many days are left, with a **Buy plan** button. Paying through Sellora Pay checkout turns on the plan straight away and unlocks publishing.

3. When the trial ends: the store is closed

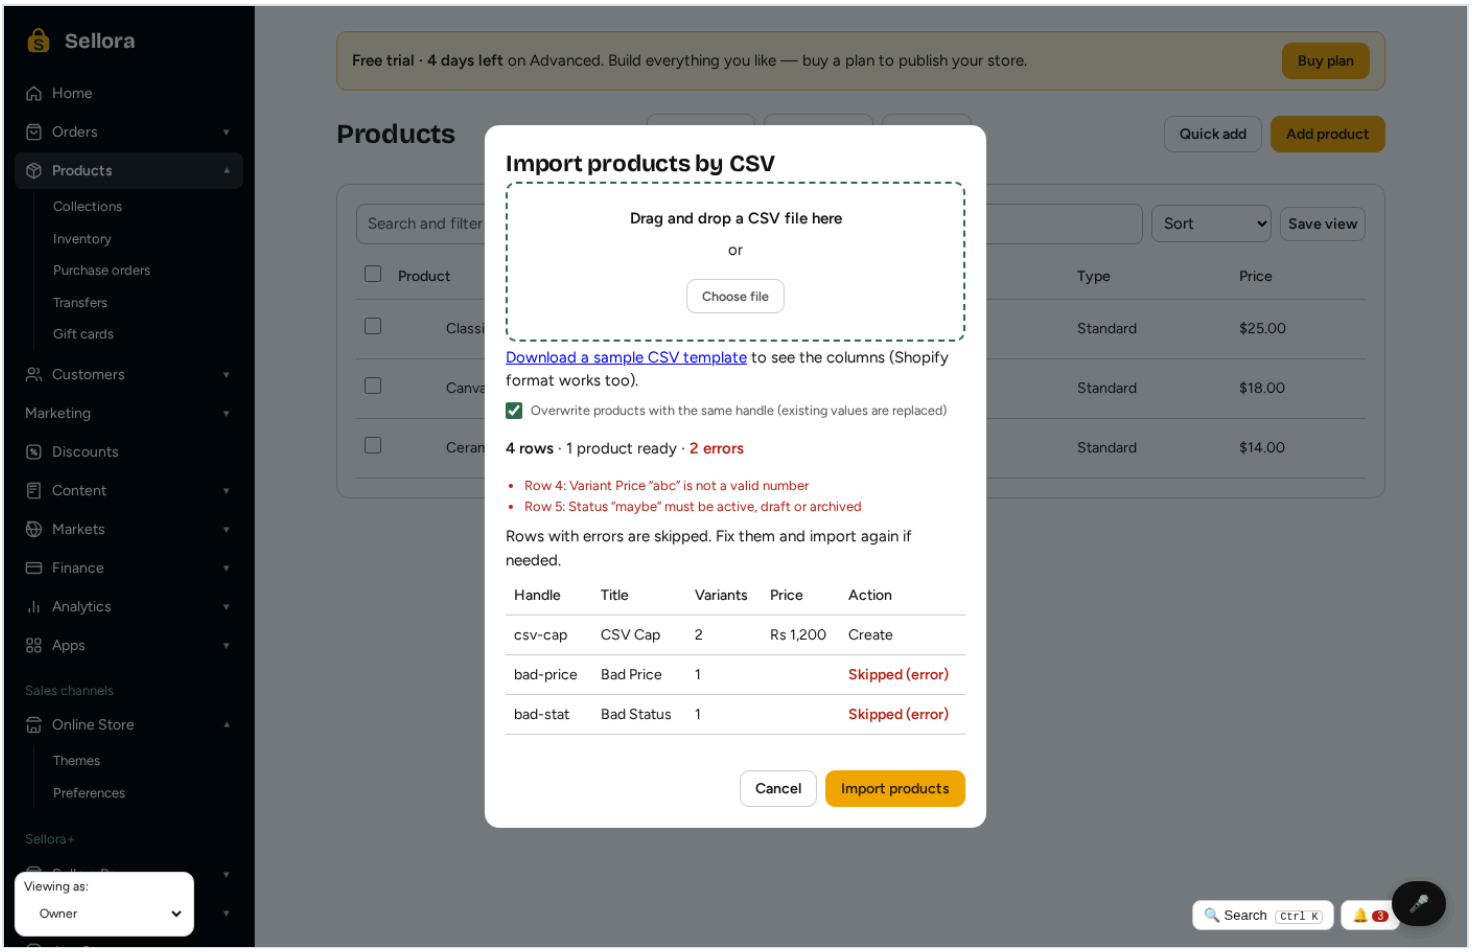

If no plan is bought within 4 days, the store closes completely. It does not stay open in read-only mode.

- The online store goes offline and shoppers see **"Store unavailable"**.
- The admin is fully blocked. The only screen the seller can open is the choose-a-plan page, where they can buy a plan or log out.
- The backend enforces the same rule. Every store and admin request returns error 402 when the trial has ended. Only billing (buying a plan) and sign-in still work. The public storefront returns 503 "Store unavailable".
- **Nothing is deleted.** Buying any plan reopens the store straight away, with every product, order, customer and setting just as it was.

4. Product CSV import and export

In **Products**, sellers can import and export a CSV file. The columns follow the common Shopify-style product CSV (Handle, Title, Body (HTML), Vendor, Type, Tags, Option1 to Option3, Variant SKU, Variant Price, Variant Compare At Price, Variant Inventory Qty, Status, Image Src, and so on). CSV import also works during the trial.

- **Import:** choose a file or drag it onto the drop zone. A preview shows every row and lists errors, such as a missing title, a bad price or an unknown status, before anything is saved. Turn on "Overwrite products with the same handle" to update existing products; otherwise they are skipped. A sample template can be downloaded.
- **Export:** choose the current page, all products, selected products or the current search results. Then choose Excel-friendly CSV or plain CSV.
- **Backend:** `GET /products/export.csv`, `POST /products/import` (with a preview mode and an overwrite option) and `GET /products/import/template.csv`.

5. Themes

The old Sellora themes (Dawn, Ember, Tide, Orchard, Noir, Bloom, Slate, Sunset, Mint, Ink, Aurora and Sand) have been removed. The library now holds only Sellora's own free themes, each with an original name. Every theme has its own homepage sections, header, footer, product page, fonts, colours and card style, plus a "Best for" line and a tag. New stores start on **Daybreak**. Any store that was using a removed theme is moved to Daybreak automatically, and nothing else changes.

Theme	Tag	Best for
Daybreak	Minimal	a clean, image-first general store
Renew	Bold & bright	energetic brands that love bold colour
Serene	Wellness	wellness, skincare and beauty
Hearthwork	Handmade	handmade goods with a story
Munchbox	Food & drink	playful food, snacks and drinks
Gallery	Art & portfolio	artists, photographers and portfolios
Palate	Recipes	food sellers who share recipes
Block Party	Colour blocks	bold brands built on colour blocks
Throttle	Sports	action, sports and outdoor gear
Source	Artisanal	makers who lead with their story
Folio	Editorial	books, magazines and text-led shops
Limelight	Single product	shops built around one hero product
Ledgerline	Wholesale	B2B and wholesale with fast re-ordering
