Sellora: external services and API needs

Prices were checked on **29 Oct 2026 (Asia/Karachi, UTC+5)** against the linked official pages. Third-party summaries were used only where noted. Prices are in US Dollar (USD) unless stated otherwise. Pakistani Rupee (PKR) amounts are converted at roughly Rs 277 = $1.

Every external service sits behind a provider interface in `sellora-backend/src/providers/*` and `src/integrations/*`. If no key is configured, Sellora uses a **mock** with the same request/response shape, so the whole app works end to end without any of these services. Merchant keys are stored encrypted with AES-256-GCM (`AppInstall.credentialsEnc`).

Legend: **NOW** = needed for a public launch in Pakistan. **LATER** = optional, or needed only at scale or for exports.

1. Platform services

Service	Purpose in Sellora	Providers (✓ = works in Pakistan)	Price (official)	Free tier	When

4. Launch monthly estimate (small store)

Assumptions: 500 orders per month (60% COD), 1,500 WhatsApp utility messages (half inside the free 24 h window), 300 WhatsApp OTPs, 2,000 emails, 100 AI listings, 2 GB images, PKR 1.5M GMV of which 40% is prepaid.

Item	Monthly
Render API service (Starter)	$7.00
Render background worker (Starter)	$7.00
Neon Postgres (Launch, light use ≈ 30 CU-h + 1 GB)	≈ $3.50
Upstash Redis / Cloudflare R2 / Turnstile / FX / Google sign-in	$0 (free tiers)
Resend email (≤ 3,000)	$0
WhatsApp utility, 750 billable × $0.015	$11.25
WhatsApp OTP, 300 × $0.015	$4.50
LLM listings and translations (gpt-4o-mini)	≈ $1
Domain (annual cost / 12)	≈ $1.50
Fixed platform total	**≈ $36 / month (≈ Rs 10,000)**
Payment fees (variable): PKR 600k prepaid, mix of Safepay cards 2.9% + Rs 30 and wallets 1–2%	≈ Rs 12,000–18,000 (≈ $45–65)
Courier tariffs	per contract (charged to the buyer or absorbed)

Needed now: Safepay (Sellora Pay escrow), JazzCash, Easypaisa, WhatsApp Cloud API, Resend, R2, Render, Neon, Turnstile, Google sign-in, FX feed, the TCS/Leopards/PostEx/Trax accounts, and the free Meta/Google catalogue and pixel apps. **Later:** Wise/Payoneer, DHL/FedEx, SMS fallback, STT, image AI, Maps, Upstash, Klaviyo/Mailchimp, Google Ads, TikTok/Pinterest/Snap/X, marketplaces, Xero/QuickBooks.

AI & SEO environment variables (backend `.env`)

Variable	Default	Purpose
`LLM_PROVIDER`	auto (`deepseek` if `DEEPSEEK_API_KEY` set, `openai` if `LLM_API_KEY`, else `mock`)	Which LLM to call
`DEEPSEEK_API_KEY`	–	DeepSeek key (platform.deepseek.com, top up balance first)
`DEEPSEEK_BASE_URL`	`https://api.deepseek.com`	OpenAI-compatible endpoint
`DEEPSEEK_MODEL`	`deepseek-flash`	or `deepseek-v4-pro`
`DEEPSEEK_THINKING`	`disabled`	`enabled` turns on reasoning (more output tokens, higher cost)

Variable	Default	Purpose
`STT_PROVIDER` / `STT_URL` / `STT_KEY`	`browser`	`http` = Whisper-compatible server transcription
`INDEXNOW_KEY`	—	Real IndexNow submissions (otherwise simulated)
`RANK_API_URL` / `RANK_API_KEY`	—	Real rank checks (otherwise simulated positions)
`COMPETITOR_FETCH`	`0`	`1` lets the competitor tool fetch public pages
`PAGESPEED_API_KEY`	—	Real Core Web Vitals field data

Without any key, every AI and SEO feature still works using built-in templates, so stores can be demoed offline.
